Addon Modules

Budgeting

Designed to enable the business to get a clear and concise overview of its financial health and to ensure enough resources are available to support the growth and development of the business.

Key Features:

- Reporting
- Planning and Forecasting
- Real-time comparison of the budget to actual business expenses

Fixed Assets

It simplifies asset acquisitions, depreciation calculations, and disposal information automatically posting in the general ledger and purchasing accounts.

Key Features:

- Manages assets meticulously.
- Forecasts and plans for expected depreciation.
- Helps in making budgeting more accurate.

Manufacturing

The system helps maintain production control, allocation of resources, and managing finances to keep the business running. It empowers the business to achieve better production by balancing supply and demand, procurement processing, and supply chain control.

Key Features:

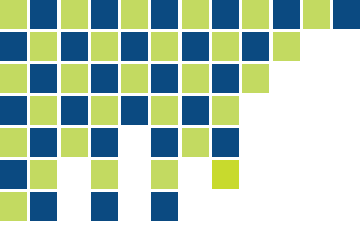

- Multiple Bill of Material (BOM) for particular finished goods.
- Production and cost analysis.
- Material issues and WIP (Work in Progress) Management
- Scrap and Bi-product management along with finished goods costing.

RiteTime Track

It is a time tracking system that can be used by businesses to track employee productivity. The employees can use the RiteTime app from any Android or iOS mobile device to keep a clock in and out for client billing purposes.

Key Features:

- Project-based and customer-based timesheet management.
- Intuitive dashboard to monitor all ongoing projects and pending tasks.
- Real-time scheduling management and time sheet management via the mobile app.

RiteReps (Sales Force Automation)

Analyzes potential business leads by optimizing your engagement with your audiences and improves business conversations. In addition, the salesforce automation solution provides onsite and offsite order booking in real-time via its mobile app.

Key Features:

- It has a fully integrated Android App for mobile devices.
- Real-time online order booking and scheduling customer visits.
- Merchandising as per the category.
- Real-time Customer geofencing and GPS tracking.

RiteRoutes (Route Sales Management)

Essential for businesses that are into route sales. It is enabled to work on any Android operated mobile device. It is designed as a flexible tool to adapt to your route sales activities including inventory management, route optimization, invoicing, route tracking, and more.

Key Features:

- Location-based route generation and customer allocation.
- Route Scheduling and real-time tracking using GPS.
- Online sales and invoice management via the RiteRoutes Android App.

RitePOS (Point of Sales)

Features POS billing, inventory management, customer loyalty program, promotion management, and store analytics.

The module offers services such as

- Offline & Online billing.
- Multiple payment modes.
- Updates on stock records.
- Manage gift cards and services.

Restaurant & Bar Management

A holistic system to manage complete restaurant operations. Designed to simplify and make efficient day to day tasks such as managing menus, shifts, tables, billings, payments, and food orders.

Key Features:

- The system offers real-time tracking of inventory to increase cost-effectiveness and reduce wastage.
- KOT and BOT Management.
- Detailed Reporting with Analytics.
- Compatible with Tablets (Android) which makes ordering and billing more efficient.

Customer Loyalty

It is primarily aimed to encourage customer acquisition and increase existing customer retention. It allows the business to reach out to its customer base across all channels (online and offline).

Key Features:

- Collects customer data through mobile numbers, barcode cards, smart cards, and the information can be used to create
- customer profiles and offer loyalty programs suited to them.
- Delivers exceptional customer experience by understanding their needs and converts customers into brand ambassadors.
- Assists you in automating marketing activities, targeting customer segments, and providing the best analytical reports.

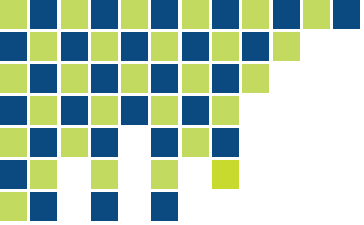

RitePayroll

Effectively processes and manages payroll which ensures every employee will be compensated correctly and on time.

Key Features:

- Run payroll calculations.
- Generate pay-slips.
- Create multiple pay slabs.
- Transfer employee salaries.
- Handle statutory compliances.
